

Specialized Autism Education

VISTA OUTREACH SERVICES

With the growing autism population, many school districts and parents are looking for a more specialized approach to autism education. Navigating through the ever changing landscape of special education can be challenging. We know these challenges and help school districts across Central PA with their special education needs.

Outreach Services

Vista Outreach Services provides a wide array of affordable, itinerant autism support services to students enrolled in both public and private schools and the educators that serve them. Vista works with educators and over 100 students in their school districts to support each child's social, intellectual and emotional

health through tailored lesson plans. We focus on developing social skills by navigating social experiences and helping students understand situations, behaviors and emotions from a different point of view. Vista currently supports students and educators in school districts within a 50-mile radius of Hershey, PA. Our services include:

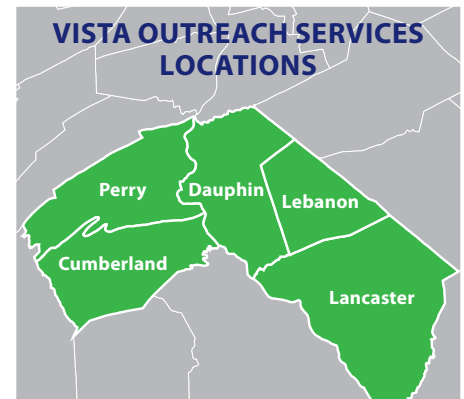

- One-on-one instruction with each student
- Consultative services to district autism support classrooms, students and teachers
- In-service teacher trainings
- Comprehensive quarterly progress reports for teachers and parents

Services for School Districts

While Vista's focus will always be autism services, a diagnosis of autism is not required for school districts to receive our services. Outreach can serve students that would benefit from our

Applied Behavior Analysis (ABA) and Evidence Based Practices, regardless of disability category as long as students' needs are within boundaries of competence.

Unique potential is within reach.

Please contact Vista to learn more about how we can support your school district or child through our Outreach Services at
